

## **We need your help:**

To be successful, we need additional helping hands. If you are interested, please send a message to Craig Edwards at [RagingRiverCG@gmail.com](mailto:RagingRiverCG@gmail.com). We can meet and discuss how you can best help us. The following descriptions are some of the RRCG immediate needs.

### **Membership:**

We know our influence with decision makers such as DPER and King County Council is helped by a large and active membership. We only have 31 members, and yet there are 58 homes within ¼ mile of the quarry property line that should be concerned about an operating quarry. We need help soliciting and signing up members.

### **Communications**

We have a number of needs related to communication including:

- General email
- Monthly updates
- Press announcements and articles
- Maintenance of the contact database
- Maintenance and updates to our webpage
- Promoting the RRCG group and brand

In addition, periodically we will need everyone to send communications to various people on selected topics, similar to the recent request to send messages related to the Quarry's public meeting on May 4<sup>th</sup>.

### **Board of Directors (BOD)**

Our goal is for the BOD to represent all our members, and have different points of view and experience. At our regular BOD meetings we discuss our strategy, alternative actions that we might take and make decisions on our next steps. The current RRCG BOD includes three property owners located above the quarry and one near the quarry along the Raging River. We would like to have 2-3 more members that would broaden the representation of our community.

### **Monitoring compliance and complaints**

Everyone can help with monitoring the compliance of the quarry to meet regulations. The RRCG will publish the regulations, and issues that we are following. Much of the daily operation of the quarry is not monitored but anytime you see an issue you can email the RRCG your description at [RagingRiverCG@gmail.com](mailto:RagingRiverCG@gmail.com). If possible, provide some type of proof. An example might be a photo of mud on the Preston- Fall City Road or dust on your plants. DPER is obligated to investigate complaints.

We need someone to take complaints we receive and use the on-line system to enter complaints into the DPER complaint system. We also need someone follow-up with the resolution of complaints.

### **Fund Raising**

We will need an ongoing effort to raise funds to support the RRCG efforts. Our approach so far has been a direct appeal to individuals. We need someone to help organize our efforts to raise funds.
